## 2010 County Highlights

- Allendale County became a chapter of Eat Smart Move More (ESMMSC).
- Promoted healthy eating through the creation of Community Gardens, promoted physical activity in a safe environment through Walk-A-Plenty Trail and developed a local strategic plan.
- Implemented hydroponics garden program for middle and high school students.
- Conducted Heart and Stroke Education, Diabetes 101 and the Cancer Education guide in Allendale County.

	Where and how changes can be made in all counties:
Community:	Construct new trails or greenways, construct bike lanes, create farmer's markets, increase cropland acreage harvested for fruit and vegetables
Schools:	Implement a Safe Routes to School program, participate in a fruit and vegetable program, incorporate physical and nutrition education into the curriculum
Worksite:	Implement a healthy eating policy, establish a breastfeeding-friendly worksite,
Child Care:	Limit sedentary time for children, establish a school garden, participate in "Fresh on Campus" program

<sup>2</sup>The physical activity recommendation says that adults should do at least 150 minutes (2 hours and 30 minutes) a week of moderate-intensity, or 75 minutes (1 hour and 15 minutes) a week of vigorous-intensity aerobic physical activity or a combination of the moderate and vigorous-intensity physical activity.

Obesity can lead to such health risks as elevated cholesterol, diabetes, high blood pressure, sleep apnea, orthopedic complications, and mental health problems.

Updated: April 2011

<sup>&</sup>lt;sup>1</sup>The Centers for Disease Control (CDC) defines overweight as having a body mass index (BMI) between 25 (lbs./in²). and 29.9 (lbs./in²). Obesity is defined as having a BMI greater than 30 (lbs./in²). For children age 2 to 20 years old, CDC has developed a definition of overweight and obesity based on the 2000 CDC growth charts for age and sex. Children and youth who are between the 85th and 95th percentiles are considered overweight; children and youth who exceed the 95th percentile on these charts are considered obese.

 $<sup>^{3}</sup>$  Recommended fruit and vegetable consumption is 2+ fruits and 3+ vegetables dailv.
